August 2017 - updated August 29, 2017

RE: New Supplemental Bus Identification System **on Transfer Buses**– Primary Age Appropriate

A trial bus identification system is being implemented September 2017 on transfer buses to aid primary age students that may not recognize numbers yet. The trial will cover only schools in Owen Sound. An animal identification system will supplement the existing numeric bus identification system

A 5”X5” magnetized animal sign will be placed mid-front panel, passenger side, near the front door of the bus for easy identification by small children. The existing numeric bus identification system will be maintained for all buses.

For students requiring a transfer, they will have to remember 2 buses, the transfer bus to their school in the AM, and their home bus for the transfer back home in the PM. If your child is required to transfer please be sure they recognize the animals that will be on the 2 buses they will ride.

Below is a listing of the route numbers and the associated animal.

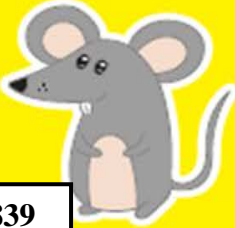

Please contact the Consortium with any questions you may have (contact information above).
